

ICS - Alarm Response

Let us deal with the Hassle !

Attending an alarm activation at your premises can sometimes be a daunting task. If there is an intruder on site what do you do about it? How do you handle the situation?

Should you not wish to leave the keys or access codes to your business in the hands of a security company, and you have an alarm activation, our response units will meet you on site and enter the building with you.

This prevents your personnel entering a potentially dangerous situation as a lone worker and allows for a safe access and controlled check of your business premises.

This is a very cost effective way of ensuring that you and your employees remain safe.
